What is Motoparking?

Motoparking is an innovative idea designed to keep your motorbike and riding gear safe and secure.

Born out of a need to make it easier for bikers to travel to their desired destination hassle free. Our unique lock up mechanism with heavy duty steel unit makes it easy for bikers to store their helmets, leathers, boots, jackets etc, giving them peace of mind while securing their motorbike while also delivering a visually appealing parking solution for our clients.

Why Motoparking?

Finding places to park motorbikes is difficult at best. We want to change that with Motoparking.

We provide a practical, secure & modern solution to a problem that had taken too long to be addressed. Working within the motorcycle industry for over six years has allowed us to have that one to one insight with customers on the needs of the everyday biker.

Understanding their needs helped us to realise the product that we now have and hope to take to locations nationally and internationally.

01

Every biker should have a safe and secure place to store their motorcycle & valuables.

02

With the introduction of electric scooters into the market place the uptake of motorcycles as a mode of transportation has grown 60% year on year over the past two years.

03

As the use of motorcycles increases so too does the theft. Westfields Shepherds Bush has reported a 99% decrease in motorcycle thefts since the installation of our units.

MOTOPARKING

OUR FACTORIES AND STOCK PRODUCTION

Our product is Italian made using the highest level of steel craftsmanship to make it hard wearing and durable while also being quick and simple to install and maintain.

Our factory capacity is built to supply large volume of units without compromising on product quality

ASSEMBLY

COLLABORATION

ELECTRICAL CHARGING OPPORTUNITY

Working together with a recognised industry leader has allowed us to incorporate a great new opportunity that allows us to offer electrical charging solutions for bikers together with the motoparking units. Electric motorcycle users have a tendency to take their charging cable and use the common electricity points. All this results in the usual chaos of parking.

By having designated charging spaces that include the Motoparking facility we believe this would increase the attractiveness of the parking solutions especially factoring in the increased use of electric bikes.

MOTOPARKING

INSTALLATIONS

CASE STUDY

WESTFIELD WHITE CITY

In 2018 we supplied and fitted over 100 units to London's largest shopping complex. The client had two main problems, motorcycle theft and chaotic motorcycle parking within the complex. After our installation both issues were resolved and we are proud to call Westfield's Shepherds Bush a partner on the motoparking journey.

- ✓ MORE THAN 50.000 SATISFIED CUSTOMERS WORLDWIDE
- ✓ 0 BIKE THEFTS REPORTED SINCE INSTALL
- ✓ CAPACITY USAGE ON 100 INSTALLED UNITS

LONDON

Security and peace of mind for your shoppers, clients and car park users

Motorcycle parking and theft can be a nightmare especially in car parks, airports, hospitals and train stations.

Don't let your customers or guests have to worry about where to park their bike. Keep them safe and secure with Motoparking, a stylish parking solution that provides an ideal location for storing and now charging bike's. Using high-quality construction and ever advancing security features, the device is designed to safeguard motorcycles from theft and vandalism, while also preserving their appearance.
